

## Mission statement

Medicvents mission is to develop, manufacture and promote a comprehensive range of products for the scavenging of air pollution mainly within the hospital care environment.

These products are aimed at improving the working environment for the clinicians and hospital staff involved with surgery, delivery and other procedures that can create a polluted working atmosphere.

Medicvent also trade products to the hospital care environment.

The market for the Medicvent products is global.

## Policy

### Quality and environment

- Our quality and environmental work shall always strive for continuous improvements based on clearly defined and focused targets.
- We shall have a strong customer focus, and the range of products shall fulfil or exceed the demand of our clients needs. Medicvents products will contribute to an improved and safer working environment.
- We shall supply high quality products which will meet or exceed standards and regulations associated with their design, manufacture and distribution.
- We shall use our resources effectively to secure high productivity and to minimize any effect on the environment.
- Our company and products shall fulfil relevant needs, demands and expectations from Medicvents ownership through to our employees, industry and the society in general.
